Recruitment Team
HENNGE K.K.
Tokyo, Japan

Dear HENNGE Recruitment Team,

I am excited to apply for the Software Engineer position at **HENNGE**. As a full stack developer with a strong focus on backend engineering, I am deeply motivated by the opportunity to join a company whose very name embodies *transformation* and *challenge*. Your culture of curiosity, diversity, and active contribution to Open Source resonates strongly with my personal values and professional aspirations.

In my four years of software development experience, I have built scalable and secure backend systems using **Python (Django)**, **Node.js**, and various SQL/NoSQL databases. Most recently at **To Go Mobility**, I designed and deployed over 50 RESTful APIs and Web Socket endpoints, optimized database performance by 60%, and implemented secure payment integrations with Paystack. At **FarmPady**, I developed a real-time chat management system capable of handling text, voice, and video messages over Web Socket with asynchronous media processing via Celery and Redis. These projects required not only technical skill but also adaptability, collaboration, and continuous learning—qualities that I know are valued at HENNGE.

I am particularly inspired by HENNGE's emphasis on "**learnaholism**" and its human-first recruitment approach. Relocating to Japan has long been a personal goal, driven by my admiration for its technology-forward culture and collaborative work ethic. I see joining HENNGE as an opportunity to both contribute my skills to impactful products and immerse myself in a culture that challenges me to grow every day.

Beyond coding, I thrive on mentoring and knowledge sharing. In previous roles, I have guided junior developers in adopting clean code principles and efficient API design, fostering an environment of technical excellence. I believe this aligns with HENNGE's vision of continuous transformation—not just for the company, but for every individual on the team.

I would welcome the chance to contribute my expertise, passion, and adaptability to HENNGE's mission. Thank you for reviewing my application, and I look forward to the opportunity to discuss how I can help HENNGE continue to innovate and excel.

Sincerely,
Toyyib Abdussalam A.
